RECEIVED

October 5, 2010

Mr. Buckner,

This letter is a request for extension of the time limit on the EPA's letter of "Request for Information". A-TEC Recycling, Inc. is requesting an extension to make our answers as accurate as possible.

A-TEC Recycling has suffered some water damage to our file storage area and had to consolidate and move several of our older files to higher shelving. By consolidating, it took us a little longer than expected to find our 2006 files. There were also several different electronic recyclers we have used since 2006. We are currently compiling our recycling weights with all of their recycling certificates to match up each year as exact as possible.

Please except my apology on the delay, I do hope to have these questions answered by Friday and the information sent. If there are any unforeseeable delays I want to make sure I have the proper amount of time to handle them. If you have any questions regarding this letter please let me know.

Sincerely,

Larry Young
A-TEC Recycling
